Copyright

OriginLab, Origin, and LabTalk are either registered trademarks or trademarks of OriginLab Corporation. Microsoft, Windows, and Windows NT are registered trademarks of the Microsoft Corporation.

©2000 OriginLab Corporation. All rights reserved.

The software (including any images, "applets," photographs, animations, video, audio, music and text incorporated into the software) is owned by OriginLab Corporation or its suppliers and is protected by United States copyright laws and international treaty provisions. Therefore, you must treat the software like any other copyrighted material (e.g., a book or musical recording) except that you may either (a) make one copy of the software solely for backup or archival purposes, or (b) transfer the software to a single hard disk provided you keep the original solely for backup or archival purposes. You may not copy the printed materials accompanying the software, nor print copies of any user documentation provided in "online" or electronic form.

Grant of License

This OriginLab Corporation End-User License Agreement ("License") permits you to use one copy of the OriginLab Corporation product Origin, which may include user documentation provided in "online" or electronic form ("software"), on any single computer, provided the software is in use on only one computer at any one time. If this package is a license pack, you may make and use additional copies of the software up to the number of licensed copies authorized. If you have multiple licenses for the software, then at any time you may have as many copies of the software in use as you have licenses. The software is "in use" on a computer when it is loaded into the temporary memory (i.e., RAM) or installed into the permanent memory (e.g., hard disk, CD-ROM, or other storage device) of that computer, except that a copy installed on a network server for the sole purpose of distribution to other computers is not "in use". If the anticipated number of users of the software will exceed the number of applicable licenses, then you must have a reasonable mechanism or process in place to ensure that the number of persons using the software concurrently does not exceed the number of licenses.

OriginLab Corporation Technical Support

Support hours are 8:30 A.M. to 6:00 P.M. EST. Users must have their Origin serial number and registration code ready. Users who have not yet registered with OriginLab Corporation should be prepared to register upon calling for technical support.

Color Fill Contour 237
Gray Scale Map Contour 238

Plotting: Graph Layers 239

Understanding Layers 239
Defining the Layer 239
Reasons for Adding Another Layer to a Graph 239
Defining the Active Layer 239
Terminology: Parent Layer vs. Child Layer 240
Controlling the Display of Elements Associated with a Layer 241
Displaying a Layer Background Color and Adding a Border 242
Displaying the Layer Frame 243
Changing the Size of a Layer 243
Controlling the Display and Scaling of the Objects in a Layer 246
Increasing the Redraw Speed in a Layer 247
Controlling the 3D Axis Length, Rotation, and Perspective in a Layer 247
Controlling the Display of the 3D Planes in a Layer 250
Viewing a 3D Graph with a Perspective or Orthographic Projection 251
Hiding Data in the 3D XY Plane 252
Adding New Layers to the Graph 254
Adding a New Set of Axes with a Scale Independent of the First Layer 254
Adding a New Set of Axes with a Scale which is Linked to the First Layer 254
Converting a Single Layer Graph into Multiple Layers 255
Copying Graphs Between Pages 255
Adding an Inset Graph 256
Adding Layers During Layer Arrangement 257
Adding Layers by Merging Pages 257
Using LabTalk to Add a Layer 257
Deleting Layers 257
Hiding Layers 258
Linking Layers and Axes 258
Linking Layers to Control the Child Layer Position and Size 258
Linking the Axes Between Layers 260
Creating a Custom Link Between Temperature Scales 262
Merging Existing Graph Windows 263
Merging 263
How Merging Affects Linked Layers 264
Converting a Multiple Layer Graph Window into Multiple Graph Windows 264
Arranging Layers on the Page 265
Using the Add & Arrange Layers Menu Command 265
Exchanging Layer Positions with the Layer Tool 265
Overlaying Layers with the Layer Tool 266
Arranging Layers with the Layer Tool 266
Arranging Layers using the Layer's Plot Details Dialog Box 266
Manually Positioning Layers on the Page 267
The Layer Tool 267

Plotting: The Axes 271

General Tips on Editing the Axes 271
Axes and Axes Titles 273

Turning On and Off the Display of the Axes and Tick Labels....273
Changing the Axis Scale and Increment....275
Changing the Length of the Axis....276
Changing the Axis Scale Type....276
Controlling the Axis Rescale Mode....277
Adding, Deleting, and Formatting an Axis Break in a 2D Graph....278
Adding a Grid....279
Adding, Editing, and Positioning an Axis Title....279
Adjusting the Axis Position....280
Exchanging the X and Y Axes in a 2D Graph Layer....281
Linking Axes in Different Layers....281
